

Dark Web & Deep Web Market List With Up & Down Daily Updated Market Status

Are you wondering how to find deep net markets? Well look no further! We have compiled a list of active hidden marketplaces available on the deep web.

Don't worry if you don't know how to access websites on the dark web. We have a guide here <https://darkwebnews.com/help-advice/access-dark-web/>

BREAKING NEWS

YOUR TOR USAGE IS BEING WATCHED!

CLICK HERE

This site is still pretty new, so please bear with us whilst we compile the list. We will be making improvements to this list over the coming weeks to include better categories, more information, user reviews and usage guides.

HAVE WE MISSED ANY? ARE THERE ANY BROKEN LINKS OR IMPROVEMENTS TO THE LIST? PLEASE LET US KNOW IN THE COMMENTS AT THE BOTTOM OF THE PAGE...

NOTE:

- We do not in any way endorse these marketplaces, this is just a list for your reference only. If a market is listed as "Trusted", this is because the market has a good reputation – do not take our word for it!
- We check every listing to see if the marketplace is active and functional.
- Do your research before using any hidden marketplace. Reddit is a good place to start: <https://www.reddit.com/r/DarkNetMarkets/>
- Remember that anonymity should be your MAIN FOCUS.
- **MUST KNOW ANONYMITY TIP:** You should be treating your anonymity like your teenage daughters virginity, with the utmost attention to maximum security! This is something not to be thrown away, do everything in your power to protect it. Once it is gone, you can not get it back and it is open season.

The FIRST thing you should do before visiting any of these darknetmarkets is get a VPN and use it along with Tor. ISP's and Law Enforcement are tracking and logging all internet usage

now so they can scan your usage and see if you are using Tor and they are assuming you are using it to access the Deep Web to buy drugs or weapons. Once you come up on their radar then you will be monitored and who wants that when you are expecting a delivery? If you use a good VPN with good encryption and keeps no logs then your ISP and LE won't know what you are doing online and they cannot even tell that you are using Tor. When using the net for research on the Deep Web, drugs or ANY topic that is not quite straight edge then ALWAYS use a VPN. If you use a VPN they will just think you are like most other people that work for big companies that have to use a VPN when working from home (VPN's have been used for years by people working from home while connecting to their companies servers so no one can hack their computers and steal the companies files and trade secrets).

You can find a good VPN here: <https://darkwebnews.com/HideTor>

The guys over at [/r/DarkNetMarkets/](https://www.reddit.com/r/DarkNetMarkets/) have put together a handy comparison chart comparing a number of different marketplaces. See the chart [here](#).

If you are looking for other sites on the Deep Web that are not Darknet Markets then click [here](#). We have compiled one of the biggest lists (THOUSANDS) of hidden .onion [deep web links](#) full with site name, categories, description and clickable links. We have even gone and tested each link and show what sites are up or dead.

↑ [Alphabay](#) ↗

Market Status: **Online**

Founded by alpha02, a well known member on carding forums. He wanted to help other people sell their stuff to people from all over the world so, he opened this market place.

-

↑ [Silk Road 3](#)

Market Status: **Online**

The name Silk Road has become synonymous with buying drugs on the internet. Older Silk Road marketplaces have been closed down and every now and then a new one with similar name pop up. That's why you should be weary of using this marketplace. Agora and other more trusted market places are safer bets.

↓ Agora

Market Status: **Offline**

NOTE: Agora was taken offline by its administrators for security reasons after it let all of its customers and vendors take out all of their money first. They may be back in the future but not for now.

Agora has been around since way back in 2013 and still around. Agora Marketplace has over 20,000 listings it is one of the most popular marketplaces on the deep web with the best reputation. The site quite often suffers downtime due to DDOS attacks and other technical issues, but is generally a reliable market. The admin take security extremely

serious so that is part of the reason they have a bit of downtime to upgrade their systems constantly, even though it would cost them millions. Agora requires a referral link to register (included in the link below).

🚫 Leo

Market Status: **Dead**

Leo Market is a brand new market with just a handful of listings – 2 drug and other 10 mostly digital listings. It uses the traditional escrow payment method. It resembles Agora market regarding the website layout, and the one can find both nice and not-so-nice user reviews of this young market.
